FASHION & TEXTILE DESIGN

Fashion Design
Fashion Technology
Clothing Production

Holmesglen's fashion and textile design courses are based on real-world projects, where students combine fashion knowledge and artistic skills to create eye-catching fashion designs.

Innovative designs are at the forefront of our offering, backed by a thorough technical foundation in pattern making, garment manufacturing and the use of computer-aided design (CAD) tools. Gain experience, stay connected, and engaged through live client briefings, hands-on experiences, industry events, and field trips.

Learn from industry-experienced trainers and start your career in the fashion and textile industry with confidence.

ARCHITECTURE & BUILT ENVIRONMENT

Landscape Architecture

Turn your hobby into a career with our horticulture and floristry courses.

Holmesglen's Landscape Design course allows you to design a wide range of residential and public spaces.

While you will work with fresh flowers daily in our Floristry course, to set mood, atmosphere and occasion. Our students take pride in participating in projects carried out in collaboration with industry partners and are regular winners of the Melbourne International Flower and Garden Show and Wildflowers Australia Competition. Our course range includes landscape construction and design, sports turf management, and parks and gardens.

INDUSTRIAL DESIGN

Furniture Design
Furniture Technology

Discover your potential and build a remarkable career in Furniture Design and Technology.

Furniture Design and Technology involves using your creativity and imagination to bring to life a variety of projects, from scratch to finished product.

You will learn about functionality and how to work with hand tools, power tools, and basic static machinery, as well as various aspects of sustainability and ergonomics.

Become self-employed or start your career in a furniture manufacturer business and use your skills to create unique designs and projects.
